Luvani, turned up.

Complete app UI · 130 state screens · six playable journeys

Open "Play the app 130screens" and press Present. The Layout & motion page shows small phones, larger text, rotation and reduced motion. Store prices, dates and earned data in the mockups are illustrative; native actions are handoffs.

Open the editable Figma file for motion, connected journeys and the device-size checks. This PDF preserves the native vector screen export.

Open Luvani in Figma ↗

Ready to review.

Scope, layout rules and production handoffs

What changed

Outfit typography, indigo, coral, sunshine and mint backgrounds; editable French scene illustrations; less repeated copy; one clear primary action; all material plan facts together at default text size.

How to explore

In Figma, open “Play the app · 130 screens” and press Present. Start with onboarding, every tab, live tutor, plan selection, payment recovery or subscription management. Settings and Friends are reached through the profile entry.

Responsive structure

Layouts follow available width, safe areas, font scale and rotation. The 375 × 812 examples fit Home, Practice, Settings and the complete trial decision without scrolling at default text size. Larger text and landscape use scrollable body and action regions. Artwork compresses first; words stay readable.

Motion

Short artwork entrances and a restrained live voice pulse. The separate Reduced Motion example stays still. Production audio-driven motion must follow the actual voice state, and all movement respects the existing reduced-motion preference.

Code delivered

Shared safe-area geometry, bounded scrollable footers, proportional illustration sizing, fewer repeated tab subtitles and a simpler selected-plan view. Local store prices and the selected billing period remain authoritative. Mobile TypeScript and all 2,600 mobile tests pass.

Fixture boundary

Prices, dates, balances, identities and earned results are design samples. The report’s weekly product, annual 45-minute trial and notification paths remain proposals. The current native catalogue uses Starter and Max with monthly/yearly products; no research prices or new products were injected into billing.

Native handoffs

Store purchase confirmation, verified entitlements, real audio, authentication, reminder permissions/scheduling, sharing and account actions require their production integrations. The prototype executes no financial or destructive action. Physical iPhone and assistive-technology testing is still needed for release acceptance.

What Luvani keeps about you, why it keeps it, how long it stays, and what you can ask us to do with it.

Who we are

Luvani is made by Vision Strategies Ltd, registered in the UK.

This notice covers the Luvani app and nothing else.

What Luvani keeps

Your email, your name and which sign-in you used. There is no account without them.

Your answer to the age question. It is a gate rather than a detail we file, and Luvani is for learners of thirteen and over.

What you have learned. Your history, your review deck, the phrases you keep, your missions and your sound checks. It sits on your phone, and on our server for an account that syncs.

Your curated conversations. After a session

luvani

A little practice adds up.

Live time with your tutor.

Example week

About four ten-minute conversations from a 45-minute weekly allowance.

Café conversation	10 minutes
Hotel check-in	10 minutes
Asking directions	10 minutes
A conversation of your own	10 minutes

An example rhythm, not a lesson limit.

Live tutor time counts

Time spent in the active live session uses your allowance.

Earned review stays free

Revisit saved phrases without using live minutes.

Unused minutes expire

They do not roll over at the next refresh.
